Contents for Volume 169

Number 1, 7 *July* 1994

NUYTS, E., Testing for the Asymmetric War of Attrition When Only Roles and Fight Duration Are Known 1

ORTEGA, G. J., ROMANELLI, L. and GOLOMBEK, D. A., Statistical and Dynamical Analysis of Circadian Rhythms 15

SWINTON, J., SCHWEITZER, A. N. and ANDERSON, R. M., Two Signal Activation as an Explanation of High Zone Tolerance: A Mathematical Exploration of the Nature of the Second Signal 23

CRONHJORT, M. B. and BLOMBERG, C., Hypercycles versus Parasites in a Two Dimensional Partial Differential Equations Model 31

KABAKOV, A. YU., The Resting Potential Equations Incorporating Ionic Pumps and Osmotic Concentration 51

HERZ, A. V. M., Collective Phenomena in Spatially Extended Evolutionary Games 65

GIERSCH, C., Determining Elasticities from Multiple Measurements of Steady-state Flux Rates and Metabolite Concentrations: Theory 89

Number 2, 21 *July* 1994

BIKTASHEV, V. N. and HOLDEN, A. V., Design Principles of a Low Voltage Cardiac Defibrillator Based on the Effect of Feedback Resonant Drift . 101

WHITTAKER, J. C. and CANNINGS, C., Multiple Trial Two Strategy Conflicts . 113

SZATHMÁRY, E., Toy Models for Simple Forms of Multicellularity, Soma and Germ 125

DEXTER, F. and BEN-HAIM, S., Theoretical Analysis Predicts that Respiratory Sinus Arrhythmia Does Not Accurately Measure Efferent Vagal Activity During Anesthesia 133

TALUSSOT, C. and PONSIN, G., The Transformation of Nascent Disc Shaped High Density Lipoproteins into Mature Spherical High Density Lipoproteins: Conformational Analysis of Apolipoprotein A-I in Model Intermediate Particles 143

CHEN, S. G., CEULEMANS, R. and IMPENS, I., Is There a Light Regime Determined Tree Ideotype? 153

BARLOW, P. W., Evolution of Structural Initial Cells in Apical Meristems of Plants 163

CAVALIERI, L. F. and KOÇAK, H., Chaos in Biological Control Systems . . 179

5 153HI XL
2/95 31249-200 1472

MALEC, P., Kinetic Modelling of Chloroplast Phototranslocations in *Lemna trisulca L.*: Two Rate Limiting Components? 189

SCHOLE, J. and SCHOLE, CHR., "Radical Theory" of Oxidative Phosphorylation and Photophosphorylation 197

Number 3, 7 *August* 1994

STOCKHOFF, B. A., Maximization of Daily Canopy Photosynthesis: Effects of Herbivory on Optimal Nitrogen Distribution 209

PÉREZ-GIL, J. and KEOGH, K. M. W., Structural Similarities between Myelin and Hydrophobic Surfactant Associated Proteins: Protein Motifs for Interacting with Bilayers 221

WRIGHT, B. E. and ALBE, K. R., Carbohydrate Metabolism in *Dictyostelium discoideum*: I. Model Construction 231

ALBE, K. R. and WRIGHT, B. E., Carbohydrate Metabolism in *Dictyostelium discoideum*: II. Systems' Analysis 243

LENSKI, R. E. and MAY, R. M., The Evolution of Virulence in Parasites and Pathogens: Reconciliation Between Two Competing Hypotheses . . 253

KHANIN, M. A. and BUKHAROV, I. B., Optimal Structure of the Microcirculatory Bed 267

BEGON, M. and BOWERS, R. G., Host–Host–Pathogen Models and Microbial Pest Control: The Effect of Host Self Regulation 275

BARRAI, I., SCAPOLI, C. and NESTI, C., Possible Identity of Transcription and Translation Signals in Early Vital Systems 289

MINETTI, A. E., Contraction Dynamics in Antagonist Muscles . . . 295

PLUHAR, W., The Molecular Basis of Wobbling: An Alternative Hypothesis . 305

DICKINSON, H. and PARKER, L., Do Alcohol and Lead Change the Sex Ratio? . 313

Number 4, 21 *August* 1994

MINI REVIEW

SYMONDS, N., Directed Mutation: A Current Perspective. 317

BLANK, M., Protein Aggregation Reactions: Surface Free Energy Model . . 323

MICHELSON, S. and LEITH, J. T., Dormancy, Regression and Recurrence: Towards a Unifying Theory of Tumor Growth Control 327

SMOLEN, P. and SHERMAN, A., Phase Independent Resetting in Relaxation and Bursting Oscillators 339

MCNAMARA, J. M., Multiple Stable Age Distributions in a Population at Evolutionary Stability. 349

GUO-HUA, L., CHENG-DE, Q. and MAO-HUI, L., On the Mechanisms of Growth Cone Locomotion: Modeling and Computer Simulation . . 355

LEMIEUX, D. R., CHICOINE H. and ROBERGE, F. A., Modeling a Non-inactivating Delayed Rectifier Cardiac Current Using Voltage Clamp Data . . 363

DE BOER, R. J. and PERELSON, A. S., T Cell Repertoires and Competitive Exclusion 375

CARNEIRO J. and STEWART, J., Rethinking "Shape Space": Evidence from Simulated Docking Suggests that Steric Shape Complementarity is not Limiting for Antibody–Antigen Recognition and Idiotypic Interactions . 391

ORPWOOD, R. D., A Possible Neural Mechanism Underlying Consciousness Based on the Pattern Processing Capabilities of Pyramidal Neurons in the Cerebral Cortex 403

PONNUSWAMY, P. K. and GROMIHA, M. M., On the Conformational Stability of Oligonucleotide Duplexes and tRNA Molecules 419

Index to Volume 169

Age distributions in a population at evolutionary stability, 349
Aggregation reactions, protein; surface free energy model, 323
ALBE, K. R. and WRIGHT, B. E., Carbohydrate metabolism in *Dictyostelium discoideum*: II. System's analysis, 243
ALBE, K. R. (see WRIGHT, B. E.), 231
Alcohol and change of the sex ratio, 313
ANDERSON, R. M. (see SWINTON, J.), 23
Anesthesia, respiratory sinus arrhythmia does not accurately measure efferent vagal activity during, 133
Antagonist muscles, contraction dynamics in, 295
Antibody-antigen recognition; rethinking "shape space", 391
Apolipoprotein A-I in model intermediate particles, conformational analysis of, 143
Arrhythmia, sinus, respiratory, does not accurately measure efferent vagal activity during anesthesia, 133
Asymmetric war of attrition, testing for, when only roles and fight duration are known, 1

BARLOW, P. W., Evoluton of structural initial cells in apical meristems of plants, 163
BARRAI, I., SCAPOLI, C. and NESTI, C., Possible identity of transcription and translation signals in early vital systems, 289
BEGON, M. and BOWERS, R. G., Host-host-pathogen models and microbial pest control: the effect of host self regulation, 275
BEN-HAIM, S. (see DEXTER, F.), 133
BIKTASHEV, V. N. and HOLDEN, A. V., Design principles of a low voltage cardiac defibrillator based on the effect of feedback resonant drift, 101
Bilayers, protein motifs for interacting with, 221
BLANK, M., Protein aggregation. Surface free energy model, 323
BLOMBERG, C. (see CRONHJORT, M. B.), 31
BOWERS, R. G. (see Begon, M.), 275
BUKHAROV, I. B. (see KHANIN, M. A.), 267
Bursting and relaxation oscillators, phase independent resetting in, 339

CANNINGS, C. (see WHITTAKER, J. C.), 113
Canopy photosynthesis, daily, maximization of, 209
Carbohydrate metabolism in *Dictyostelium discoideum*, 231, 243
Cardiac current, non-inactivating delayed rectifier; modeling using voltage clamp data, 363
Cardiac defibrillator, low voltage, design principles based on the effect of feedback resonant drift, 101
CARNEIRO, J. and STEWART, J., Rethinking "shape space": Evidence from simulated docking suggests that steric shape complementarity is not limiting for antibody-antigen recognition and idiotypic interations, 391
CAVALIERI, L. F. and KOÇAK, H., Chaos in biological control systems, 179
Cells, initial, structural, in apical meristems of plants, evolution of, 163
Cerebral cortex, pattern processing capabilities of pyrimidal neurons in, 403
CEULEMANS, R. (see CHEN, S. G.), 153
Chaos in biological control systems, 179
CHEN, S. G., CEULEMANS, R. and IMPENS, I., Is there a light regime determined tree ideotype?, 153
CHICOINE, H. (see LEMIEUX, D. R.), 363
Chloroplast phototranslocations in *Lemna trisulca*; two rate limiting components?, 189
Circadian rhythms, statistical and dynamical analysis of, 15
Collective phenomena in spatially extended evolutionary games, 65
Competitive exclusion, T cell repertoires and, 385
Conflicts, two strategy, multiple trial, 113
Conformational analysis of apolipoprotein A-I in model intermediate particles, 143
Conformational stability of oligonucleotide duplexes and tRNA molecules, 419
Consciousness, neural mechanism underlying, 403
Contraction dynamics in antagonist muscles, 295
Control systems, biological, chaos in, 179
CRONHJORT, M. B. and BLOMBERG, C., Hypercycles versus parasites in a two dimensional partial differential equations model, 31

DE BOER, R. J. and PERELSON, A. S., T cell repertoires and competitive exclusion, 375
Defibrillator, cardiac, low voltage, design principles based on the effect of feedback resonant drift, 101

DEXTER, F. and BEN-HAIM, S., Theoretical analysis predicts that respiratory sinus arrhythmia does not accurately measure efferent vagal activity during anesthesia, 133
DICKINSON, H. and PARKER, L., Do alcohol and lead change the sex ratio?, 313
Dictyostelium discoideum, carbohydrate metabolism in, 231, 243
Dormancy and tumor growth control, 327
Dynamical analysis of circadian rhythms, 15

Elasticities determined from measurements of steady-state flux rates and metabolite concentrations; theory, 89
Evolution of structural initial cells in apical meristems of plants, 163
Evolution of virulence in parasites and pathogens, 253
Evolutionary games, collective phenomena in, 65
Evolutionary stability, multiple age distributions in a population at, 349

Feedback resonant drift in design of low voltage cardiac defibrillator, 101

Games, evolutionary, collective phenomena in, 65
Germ, multicellularity and soma; toy models, 125
GIERSCH, C., Determining elasticities from multiple measurements of steady-state flux rates and metabolite concentrations: theory, 89
GOLOMBEK, D. A. (see ORTEGA, G. J.), 15
GROMIHA, M. M. (see PONNUSWAMY, P. K.), 419
Growth cone locomotion mechanisms; modeling and computer simulation, 355
Growth control, tumor, 327

Herbivory, effects on optimal nitrogen distribution; canopy photosynthesis, 209
HERZ, A. V. M., Collective phenomena in spatially extended evolutionary games, 65
High zone tolerance, two signal activation as an explanation of, 23
HOLDEN, A. V. (see BIKTASHEV, V. N.), 101
Host-host-pathogen models and microbial pest control; effect of host self regulation, 275
Hypercycles versus parasites in a two dimensional partial differentiation equations model, 31

IMPENS, I. (see CHEN, S. G.), 153
Ionic pumps incorporated in the resting potential equations, 51

KABAKOV, A. YU, The resting potential equations incorporating ionic pumps and osmotic concentration, 51
KEOGH, K. M. U. (see PÉREZ-GIL, J.), 221
KHANIN, M. A. and BUKHAROV, I. B., Optimal structure of the microcirculatory bed, 267
Kinetic modelling of chloroplast phototranslocations in *Lemna trisulca*; two rate limiting components?, 189
KOÇAK, H. (see CAVALIERI, L. F.), 179

Lead and change of the sex ratio, 313
LEIGT, J. T. (see MICHELSON, S.), 327
LEMIEUX, D. R., CHICOINE, H. and ROBERGE, F. A., Modeling a non-inactivating delayed rectifier cardiac current using voltage clamp data, 363
Lemna trisulca, chloroplast phototranslocations in; two rate limiting components?, 189
LENSKI, R. E. and MAY, R. M., The evolution of virulence in parasites and pathogens: reconciliation between two competing hypotheses, 253
LI, G.-H., QIN, C.-D. and LI, M.-H., On the mechanisms of growth cone locomotion modeling and computer simulation, 355
LI, M.-H. (see LI, G.-H.), 355
Light regime determined tree ideotype, 153
Lipoproteins, high density, nascent disc shaped, transformation into mature spherical high density lipoproteins, 243
Locomotion, growth-cone, mechanisms of, 355

MCNAMARA, J. M., Multiple stable age distributions in a population at evolutionary stability, 349
MALEC, P., Kinetic modelling of chloroplast phototranslocations in *Lemna trisulca* L.: Two rate limiting components?, 189
MAY, R. M. (see LENSKI, R. E.), 253
Meristems, apical, of plants, evolution of structural initial cells in, 163
Metabolism, carbohydrate, in *Dictyostelium discoideum*, 231, 243

Metabolite concentrations, determining elasticities from multiple measurements of steady state flux rates and; theory, 89
MICHELSON, S. and LEIGT, J. T., Dormancy, regression, and recurrence: towards a unifying theory of tumor growth control, 327
Microbial pest control, and host-host-pathogen models, 275
Microcirculatory bed, optimal structure of, 267
MINETTI, A. E., Contraction dynamics in antagonist muscles, 295
Molecular basis of wobbling, 305
Multicellularity, soma and germ; toy models, 125
Muscles, antagonist, contraction dynamics in, 295
Mutation, directed; a current perspective, 317
Myelin and hydrophobic surfactant associated proteins, structural similarities between, 221

NESTI, C. (see BARRAI, I.), 289
Neural mechanism underlying consciousness, 403
Nitrogen distribution, optimal, effects of herbivory on, 209
NUYTS, E., Testing for the asymmetric war of attrition when only roles and fight duration are known, 1

Oligonucleotide duplexes and tRNA molecules, conformational stability of, 419
ORPWOOD, R. D., A possible neural mechanism underlying consciousness based on the pattern processing capabilities of pyramidal neurons in the cerebral cortex, 403
ORTEGA, G. J., ROMANELLI, L. and GOLOMBEK, D. A., Statistical and dynamical analysis of circadian rhythms, 15
Oscillators, relaxation and bursting, phase independent resetting in, 339
Osmotic concentration, the resting potential equations incorporating ionic pumps and, 51
Oxidative phosphorylation and photophosphorylation, "radical theory" of, 197

Parasites, hypercycles versus, in a two dimensional partial differential equations model, 31
Parasites and pathogens, the evolution of virulence in, 253
PARKER, L. (see DICKINSON, H.), 313
Pathogen-host-host model and microbial pest control, 275
Pathogens, the evolution of virulence in parasites and, 253
Pattern processing capabilities of pyramidal neurons in the cerebral cortex, 403
PERELSON, A. S. (see DE BOER, R. J.), 375
PÉREZ-GIL, J. and KEOGH, K. M. W., Structural similarities between myelin and hydrophobic surfactant associated proteins: protein motifs for interacting with bilayers, 221
Pest control, microbial, and host-host-pathogen models, 275
Phosphorylation, oxidative, "radical theory" of, 197
Photophosphorylation, "radical theory" of oxidative phosphorylation and, 197
Photosynthesis, canopy, daily, maximization of, 209
Phototranslocations, chloroplast, in *Lemna trisulca*; two rate limiting components?, 189
Plants, evolution of structural initial cells in apical meristems of, 163
PLUHAR, W., The molecular basis of wobbling: an alternative hypothesis, 305
PONNUSWAMY, P. K. and GROMIHA, M. M., On the conformational stability of oligonucleotide duplexes and tRNA molecules, 419
PONSIN, G. (see TALUSSOT, C.), 143
Protein aggregation reactions; surface free energy model, 323
Protein motifs for interacting with bilayers; structural similarities between myelin and hydrophobic surfactant associated proteins, 221
Pumps, ionic, incorporated in the resting potential equations, 51
Pyramidal neurons in the cerebral cortex, pattern processing capabilities of, 403

QIN, C.-D. (see LI, G.-H.), 355

"Radical theory" of oxidative phosphorylation and photophosphorylation, 197
Recognition, antibody-antigen; rethinking "shape space", 391
Recurrence and tumor growth control, 327
Regression and tumor growth control, 327
Regulation, self, host, and microbial pest control, 275
Relaxation and bursting oscillators, phase independent resetting of, 339
Respiratory sinus arrhythmia does not accurately measure efferent vagal activity during anesthesia, 133
Resting potential equations incorporating ionic pumps and osmotic concentration, 51
Rhythms, circadian; statistical and dynamical analysis, 15
ROBERGE, F. A. (see LEMIEUX, D. R.), 363
ROMANELLI, L. (see ORTEGA, G. J.), 15

Scapoli, C. (see Barrai, I.), 289
Schole, Chr. (see Schole, J.), 197
Schole, J. and Schole, Chr., "Radical theory" of oxidative phosphorylation and photophosphorylation, 197
Schweitzer, A. N. (see Swinton, J.), 23
Sex ratio: changes by alcohol and lead, 313
"Shape-space", rethinking of, 391
Sherman, A. (see Smolen, P.), 339
Signal, second, exploration of; two signal activation as an explanation of high zone tolerance, 23
Sinus respiratory arrhythmia does not accurately measure efferent vagal activity during anesthesia, 133
Smolen, P. and Sherman, A., Phase independent resetting in relaxation and bursting oscillators, 339
Soma, germ and multicellularity; toy models, 125
Steady-state flux rates and metabolite concentrations, determining elasticities from multiple measurements of, 89
Steric shape complementarity and antibody-antigen recognition, 391
Stewart, J. (see Carneiro, J.), 391
Stockhoff, B. A., Maximizaton of daily canopy photosynthesis: effects of herbivory on optimal nitrogoen distribution, 209
Structural initial cells, evolution of, in apical meristems of plants, 163
Structural similarities between myelin and hydrophobic surfactant associated proteins; protein motifs for interacting with bilayers, 221
Structure, optimal, of the microcirculatory bed, 267
Surface free energy model of protein aggregation reactions, 323
Swinton, J., Schweitzer, A. N. and Anderson, R. M., Two signal activation as an explanation of high zone tolerance: a mathematical exploration of the nature of the second signal, 23
Symonds, N., Directed mutation: a current perspective, 317
Szathmáry, E., Toy models for simple forms of multicellularity, soma and germ, 125

T cell repertoires and competitive exclusion, 385
Talussot, C. and Ponsin, G., The transformation of nascent disc shaped high density lipoproteins: conformational analysis of apolipoprotein A-I in model intermediate particles, 143
Toy models for simple forms of multicellularity, soma and germ, 125
Transcription and translation signals in early vital systems, 289
Translation signals in early vital systems, 289
Tree ideotype, light regime determined, 153
tRNA molecules, conformational stability of oligonucleotide duplexes and, 419
Tumor growth control; unifying theory, 327
Two rate limiting components?; chloroplast phototranslocations in *Lemna trisulca*, 189
Two signal activation as an explanation of high zone tolerance: a mathematical exploration of the nature of the second signal, 23
Two strategy conflicts, multiple trial, 113

Vagal efferent activity during anesthesia is not accurately measured by respiratory sinus arrhythmia, 133
Virulence, evolution in parasites and pathogens, 253
Vital systems, early, possible identity of transcription and translation signals in, 289
Voltage clamp data used in modeling a non-inactivating delayed rectifier cardiac current, 363

War of attrition, asymmetric, testing for, when only roles and fight duration are known, 1
Whittaker, J. C. and Cannings, C., Multiple trial two strategy conflicts, 113
Wobbling, the molecular basis of, 305
Wright, B. E. and Albe, K. R., Carbohydrate metabolism in *Dictyostelium discoideum*: I. Model construction, 231
Wright, B. E. (see Albe, K. R.), 243
